

PRODUCT ABSTRACT SUSTAIN CORK RUBBER TILE

Z201

Thoughtfully designed to be attractive and high performance, Sustain is a unique flooring made from 65% cork and rubber. This unique blend provides a floor that leads the industry with best in class comfort, slip resistance and sustainability. Sustain cork rubber is typically used in commercial applications where durability and ease of maintenance are required in addition to its other great benefits. Typical uses include hospitals, universities, lobbies, break rooms and offices. Sustain is

extremely stain and scratch resistant and its unique texture creates a natural look, unique in resilient flooring. The through-body construction of Sustain ensures that the color and patterning won't prematurely degrade even in high traffic conditions.

- **Made from 65% Recycled & Renewable Cork.** Highest of any vulcanized rubber flooring
- **Best in Class Slip Resistance and Underfoot Comfort**
- **Superior Acoustical Properties** compared to solid rubber and vinyl products.
- **Qualifies for numerous LEED credits**
- **Meets CA 01350 Indoor Air Quality tests required for CHPS and Floorscore Certification**
- **Extremely Durable**
- **Low Maintenance**
- **Safe – Red List Chemical Free, Best in Class Slip Resistance, anti-bacterial**
- **Problem Solver** industry leading slip resistance and acoustical performance

How does Sustain Cork Rubber Flooring Compare to other Resilient Flooring Including Rubber, VCT and LVT?

- Greater under foot comfort
- Superior slip resistance
- 65% recycled/renewable content
- Best in Class sound reduction
- Natural texture. Non-glare.

Available Formats:

Tile Thickness:

- Standard: 2.5mm
- Acousticz IIC71: 3.5mm,
- Sport: 6.0mm, 9.0mm
- Interlock: 6.0mm, 9.0mm

Sizes: 40" x 40", 20" x 20", 20" x 40", 10" x 40", 10" x 20"

Comparison to other commercial flooring options:

- LVT/Vinyl – The inherent resilience of rubber makes it more comfortable and scratch resistant. Cork Rubber won't shrink and its very quiet.
- Linoleum – There are no limits to colors or textures with rubber. Additional differences include superior acoustics and underfoot comfort.
- Carpet - Incredible stain resistance and ease of maintenance sets cork rubber apart. With Sustain, there is no place for dirt and grit to hide resulting in cleaner floors and air.
- Recycled Rubber – Sustain Cork Rubber has no unpleasant odor and is non-porous. It doesn't require a topical finish and won't break down from sweat and other contaminants common in a workout environment.

Select Installation References:

Arizona State University Sports Complex, AZ	United Nations, NY	Campbell's Soup, NJ
Old Navy Stores, National	Sacramento State University, CA	Seattle Children's Hospital, WA
Delta Airlines, NY	Dell CA Headquarters, CA	N. Chicago VA Hospital, IL
Penn State University Dining Area, PA	Google, National	Cisco Systems, CA

Suggested Applications:

Health Care	Offices, General Commercial
Retail Stores	Hospitality, Restaurants, Hotels
Airports, Rail Stations	Stadiums
Education Facilities, Libraries	Installations w/ Heavy Rolling Loads

General Installation:

Concrete & Plywood: Install Sustain over smooth sub-floor using one of three adhesives depending upon traffic and load conditions..

Access Flooring: Install Sustain Access in interlock or with releasable adhesive

Maintenance: After initial maintenance cleaning, floor may be left uncoated or may be coated with an acrylic or urethane finish. Damp mop with neutral cleaner on regular basis. Floor may be scrubbed as desired.

Beneficial Properties in Detail:

Slip Resistant – Sustain has the highest slip resistance available in rubber flooring. Materials exceed applicable standards and recommendations to reduce the possibility of slip & fall claims. In the event a fall does occur, the product's resilience can help to limit injuries.

Low Reflectivity - The texture of the product reduces glare and reflection which is particularly important for assisted living applications.

Durable – Products are manufactured so that patterns and colors run through entire thickness. Even after years of use, it will maintain its pattern, color and beauty. Zandur products are warranted for 10 years against complete wear through.

Acoustically Beneficial – The cork component significantly enhances acoustical benefits reducing sound levels from foot traffic. Its acoustic properties are superior to other resilient flooring including vinyl, solid rubber and linoleum.

Comfortable – Sustain is composed of 65% cork which ensures that the flooring is comfortable and resilient under foot and feels warm to the touch. Particularly beneficial in applications where users are on their feet for extended periods of time as it effectively reduces fatigue.

Easy To Maintain –Routine maintenance involves damp mopping or using an auto-scrubber in combination with a suitable cleaning solution. Finishes are typically not required. Most resilient flooring maintenance regimes are compatible with Zandur Rubber based products.

Low life cycle cost – During the life of the product, the annual cost is less than other materials such as vinyl and carpeting due to reasonable product cost, low maintenance costs and high durability.

Safe: Sustain Cork rubber meets all US and International standards for Fire, Smoke and Slip Resistance. Additionally, it is comfortable underfoot and anti-microbial. Like all Zandur rubber products, Sustain is Red-List Chemical Free.
